COLOSTRUM CREAM

It works miracles to create healthy, beautiful, young skin!

GIVE YOUR SKIN THE HELP IT NEEDS!

Our skin takes more abuse than any other part of our body! Unfortunately, it *often shows!* Sometimes we *look years older* than our actual age. Some people have itches, rashes, blotches, bumps or pimples on the skin, which are both *irritating and embarrassing!* Then there are those whose sensitivity to the sun leads to skin lesions, which turn into a *dangerous cancer!*

NOW - THERE IS A SIMPLE, NATURAL WAY TO GIVE YOUR SKIN THE EXTRA HELP IT NEEDS! AT LAST SCIENCE HAS FOUND AN EXCITING NEW WAY FOR YOU TO REVERSE AND PREVENT ALL OF THESE SKIN PROBLEMS!

COLOSTRUM IS THE ANSWER!

Mother Nature has placed a treasure house of natural ingredients to feed, nourish and yes, *even rebuild the skin* in an all natural substance known as colostrum. ***COLOSTRUM IS SO SAFE, IT IS MEANT FOR BABIES!*** That's right, for babies! Colostrum is the first food a baby receives from its mother's breast in the first 36 to 48 hours. Science has found that colostrum contains a ***wide assortment of truly amazing and miraculous substances that will nourish and rebuild the skin!***

PROTECTION FOR THE SKIN!

Our first line of defense against invading microorganisms (germs) - is our skin. Healthy skin contains a wide range of antibodies for its protection.

Skin which has rashes, itches, blotches, blisters, bumps and pimples *has run short of these protective antibodies.* Colostrum contains a high concentration of antibodies in the four main classes of immunoglobins required for healthy skin, IgG, IgM, IgA and Secretory IgA(1). This means that ***colostrum applied directly to the skin can give it germ killing antibody protection!***

STUBBORN WOUNDS HEAL RAPIDLY!

The Institute has been studying colostrum for the past eleven years. During this time, we have seen many cases of wounds that were infected and would not heal. Even after treatment with antibiotics, they would not heal. *Then with the application of colostrum cream, because of immunoglobins and antibodies, these wounds healed very rapidly!* The Institute has witnessed many cases of microbial and fungal infection of the skin (which had resisted the best efforts of dermatologists) ***clear almost overnight when colostrum cream was applied! Due in large measure to the wide range of antibodies present in colostrum.(2)***

UNSIGHTLY, ITCHING RASH DISAPPEARS!

A few years ago, a seven year old girl developed a terrible, itching rash. It was both uncomfortable and embarrassing. After spending large sums of money going from one skin specialist to another, her parents finally took her to two of California's finest medical universities. Test after test was performed, yet no cause or cure could be found. Finally, a neighbor told them to at least try this colostrum cream. ***After only one application the itching and rash were nearly gone, in another 25 hours, IT HAD TOTALLY DISAPPEARED!*** It sounds like a miracle, but in reality it was just the science nature has placed in colostrum. In 1983, at the Institute of Immunology in Poland, and at the University of Alabama, a special Proline Rich Protein was discovered. It was named PRP-3B, and was found to ***"Increase the permeability of the skin vessels and that it has a regulatory activity, stimulating OR suppressing the immune response...it stimulated low, AND suppressed high immune responses."***(3). It was the presence of the PRP-3B, the immune regulating protein found in colostrum, that turned down the excessive immune response that was creating the little girl's terrible rash. ***COLOSTRUM'S NATURAL IMMUNE REGULATING PEPTIDE CALMS DOWN OVERREACTIVE SKIN CONDITIONS!***

VITAMINS FOR THE SKIN!

To have really beautiful skin, the skin must be well nourished, and the most important of all the vitamins for the skin is vitamin A. In fact, one of the most exciting developments in creating youthful skin has been the discovery of retinoic acid, a form of vitamin A. Colostrum is an exceptionally rich source of vitamin A. ***In fact, the vitamin A content of colostrum has been found to be over 10 times greater than the vitamin A content of the blood,(4) which is just one of the reasons that users of Colostrum Cream report THAT THE LONGER THEY USE IT, THE YOUNGER THEIR SKIN BECOMES!***

COLOSTRUM RICH IN NUCLEOTIDES!

That title doesn't mean much to the average person, but it means a lot to a biochemist studying aging. You see, the key to the long life of a cell, and its ability to repair and reproduce itself perfectly, is found in the *quality of its nucleic acids DNA and RNA*. This is because DNA and RNA are the master blueprint and control mechanisms of the cell. The ***nucleotides found in colostrum*** are the building blocks for the creation, maintenance and repair of this vitally important DNA and RNA. ***Colostrum is one of the richest known sources for nucleotides.(5) Colostrum Cream places nucleotides right on the cells of the skin, where they can reach the RNA and DNA of the skin by direct transdermal absorption, thus promoting rapid repair and the maintenance of healthy skin.***

EPIDERMAL GROWTH FACTOR FOR YOUNGER SKIN!

We have saved the best for last! Scientists from around the world have isolated an important polypeptide from colostrum known as Epidermal Growth Factor or EGF. The word "epidermal" means skin. This EGF (Epidermal Growth Factor) in colostrum has the amazing ability to stimulate the DNA and RNA *to repair the cells of the skin even when damaged by age, sun, chemicals or injury!* There are very few sources for EGF and colostrum turns out to be just about the richest of them all.(6) ***Colostrum Cream places these Epidermal Growth Factors on the surface of the skin cells, where they are rapidly absorbed through transdermal migration. ONCE IN THE SKIN CELLS THIS EGF PROMOTES RAPID REPAIR AND HEALING! EVEN FOR SKIN THAT HAS BEEN BADLY DAMAGED BY AGE, SUN, AND CHEMICALS! SKIN CELLS RAPIDLY BECOME YOUNG, HEALTHY AND ATTRACTIVE ONCE AGAIN!***

THE INSTITUTE SUGGESTS:

After years of studying and working with Colostrum Cream, we have come to regard it as something of a miracle worker for cuts, burns, abrasions, rashes, sun protection, acne, and to restore dry, old skin to the look of youth. For best results, we suggest daily and repeated applications to all exposed and injured skin.

Ingredients

Deionized Water, Colostrum, Aloe Vera, Butylene Glycol, Stearic Acid, Isopropyl Myristate, DL Panthenol, Ethylene Glycol Monostearate, Cetyl Alcohol, Cetyl Palmitate, Polysorbate 60, DMDM Hydantoin, Safflower Oil, Glyceryl Monostearate, Geogard 361, Aminomethyl Propanol, Carbomer, Sodium PCA, Methyl Salicylate, Eucalyptus Oil, Camphor.

Suggested use

As a moisturizing cream apply as necessary to skin areas in need of revitalization.
